

## Fairfax Imaging, Inc. Celebrating 20<sup>th</sup> Anniversary Throughout 2014

**Tampa, FL, March 12, 2014** – Established in Fairfax County, Virginia, in August, 1994 by co-founders Tony Cristofano and Steve Chahal, Fairfax Imaging, Inc. celebrates its 20<sup>th</sup> anniversary in 2014. Fairfax Imaging has become a leader in the document and image processing solution business and takes great pride in being the engine that has driven billions of financial and business transactions over twenty years, and counting.

“This 20<sup>th</sup> anniversary is the culmination of a lot of hard work. We started the business 20 years ago, as any startup company would, with no employees, no customers, and no product. Armed with the vision to build the best integrated imaging system for business, we were able to climb the verticals that we set out for ourselves to become the uncontested leader in our space today” said Tony Cristofano, co-founder of Fairfax Imaging.

“We started out as just Tony and I. Yet twenty years later, employee # 1, employee # 2, and employee # 3 are still with us today. That is a remarkable achievement of talent retention and recognition in this day and age of fierce competition, especially in our industry”, said Steve Chahal, co-founder of Fairfax Imaging.

Since its first installation, Fairfax Imaging has grown to become an integrated provider to over 32 state government agencies (revenue, labor, and motor vehicle departments) and many more pharmaceutical fulfillment organizations, insurance companies, and financial organizations. At most of these customer sites, Fairfax Imaging has been entrusted with the most mission-critical application of capturing every check and every financial transaction that they receive, and placing it in their respective bank, then balancing the receivables down to the penny every single business day.

From California to New Hampshire, real efficiencies in forms processing are daily occurrences for these organizations which use *Quick* Modules, Fairfax’s forms, fax, and remittance processing solution. Throughout its history, Fairfax Imaging has enjoyed continued and steady growth in revenue and profitability. Revenue earned in 2013 marked the highest in company history. In 2014, various celebrations will take place to commemorate the founding of Fairfax Imaging, Inc.

The headquarters of the firm was moved to Tampa, Florida in 2008. Business and development offices remain in Maryland, Kentucky, California, Texas, and New Jersey. Fairfax Imaging has also founded and maintains a software development office in Ho Chi Minh City, Vietnam.

### **About Fairfax Imaging, Inc.**
