When printing from the Edge browser, there are no print settings specific to the browser that need to be changed prior to printing. All settings are specific to the printer you are using, and all printer settings can vary, but your printer will have the same or similar settings described below.

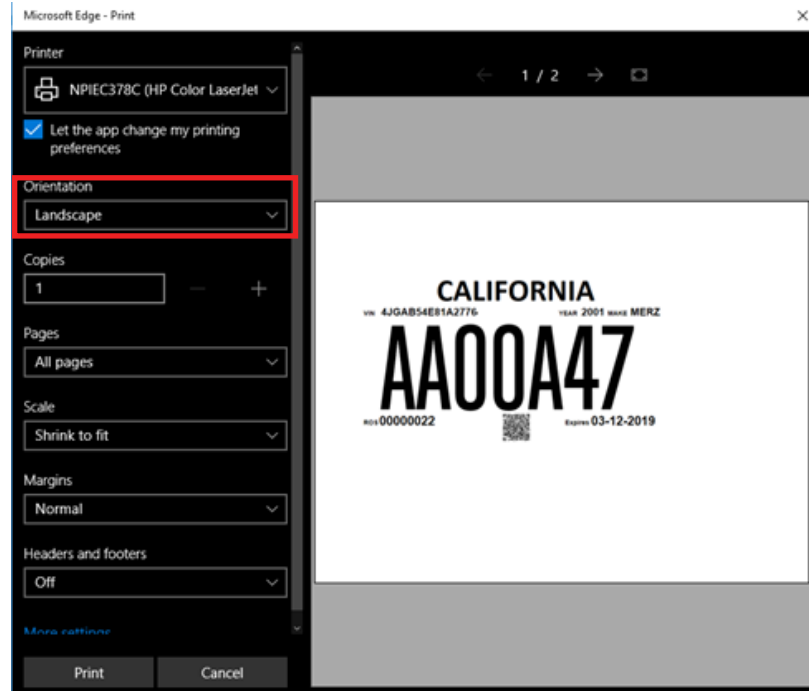

1. Ensure TLP paper is loaded in the printer when prompted. Select Confirm.

2. The Print command screen will display.

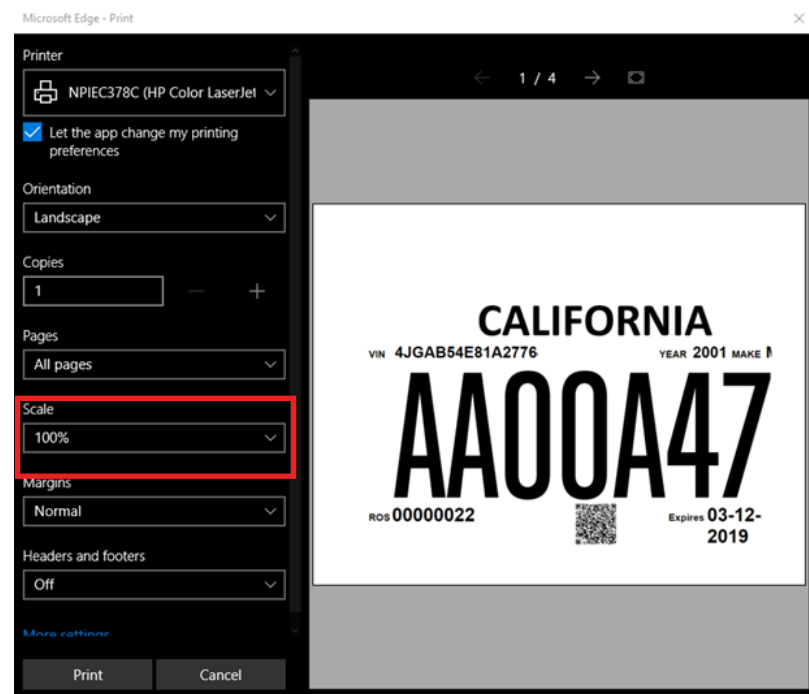

3. Set Orientation to Landscape

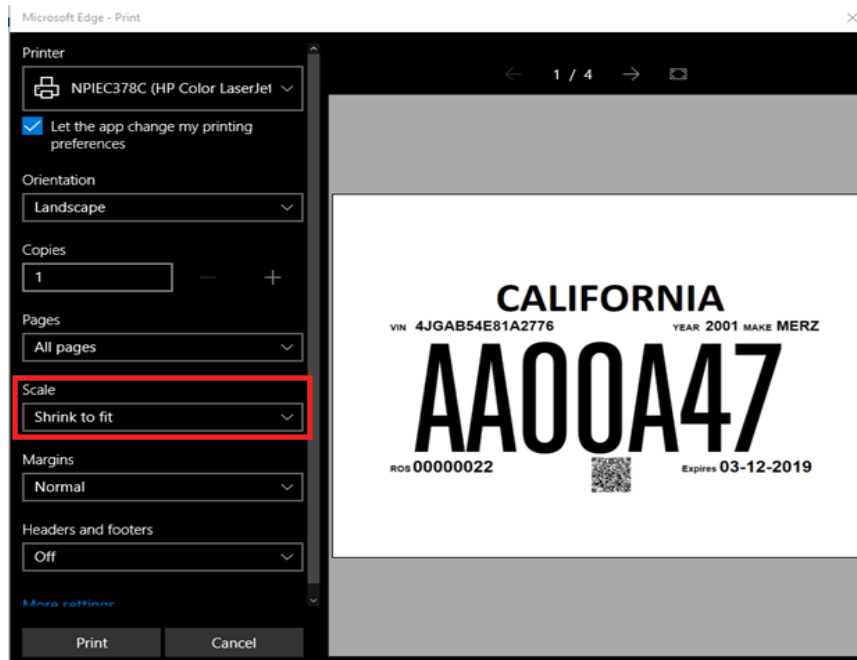

***You'll notice from the above screen shot, after setting the Orientation, it's obvious the TLP is still too small.**

4. In the Scale setting, You need to change the setting from “Shrink to Fit” to “100%” and then BACK to “Shrink to Fit.”

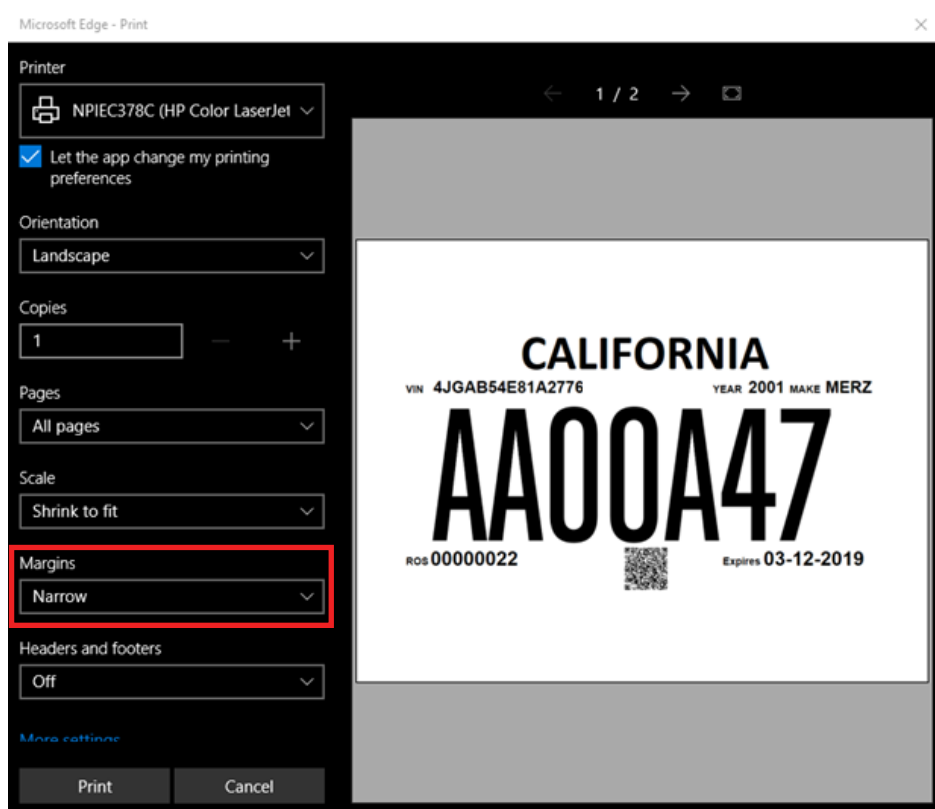

***DO NOT PRINT AT 100%! If you notice in the above screen, the TLP is too big now.**

5. Now set it Scale setting BACK to Shrink to Fit.

***In the above screen shot you'll notice the TLP has resized correctly now.**

8. Now set Margins to Narrow.

9. You are now ready to print the TLP(s). Select Print.
