Meets State DMV Requirements

Designed by Fairfax Software, *Quick* Tags is configurable to accommodate unique state requirements and provides robust features for agency oversight.

- Dealership and dealer license verification when users are registered on *Quick* Tags

- Automatic license-in-good-standing verification every time a dealer or dealership user logs in

- Tag numbers are managed by a database and assigned to a vehicle at the time of registration

- The printing of duplicate temporary tags is tightly controlled

- DMV personnel can suspend an individual user or a dealership if required

- All user actions within *Quick* Tags are recorded in the audit database

- Configurable business rules and workflow to easily accommodate unique registration and fee payment rules

- A cloud based solution hosted by Fairfax Software

Streamlined Dealership Experience

Quick Tags simplifies vehicle registration with a web-based service that allows new vehicle registrations to be issued and printed by the dealer when the vehicle is sold.

Convenient features for the dealer include the ability to reprint a registration when required, void a registration, research registrations, and print reports by individual dealer user as well as dealership-wide reports. *Quick* Tags is printer and paper independent to easily accommodate state requirements for printing. Use any workstation with secure internet connection and a browser.

Web-based training and help-desk support is provided. Using *Quick* Tags, dealerships can easily add and delete dealership personnel that can register a vehicle.

Convenient options are available to dealerships for fee payment.

About Fairfax Software

Fairfax Software, headquartered in Tampa, Florida, was founded in 1994 to provide high-quality products and integration services to the electronic payment, document, fax, and form processing industries. Since its inception, Fairfax Software has remained focused on its primary niche area of expertise.

Quick Tags is based on Fairfax Software's *Quick* Modules platform, the system of choice for numerous state agencies responsible for processing millions of vehicle and driver license renewals, tax and fee collections, temporary vehicle registrations, and other DMV forms. *Quick* Modules systems successfully processes billions of transactions with data captured online, from documents, checks, electronic files, fax messages, and remittances.

Quick Tags Features

- **Car Dealers** *Quick* Tags allows dealers to issue a temporary vehicle registration using a secured internet connection, a web browser, and a standard printer.
- **DMV** Agency users can research and audit the *Quick* Tags database, audit dealers and dealerships, suspend users, and void temporary registrations. Notifications can be sent within *Quick* Tags to all users, all users of a dealership, or to an individual user.
- **Law Enforcement** Law enforcement users have access to the *Quick* Tags database to research registrations.
- **Help Desk** A fully staffed help desk is provided by Fairfax Software to assist dealers, DMV, and law enforcement users.
- **Encryption**. All data is safe and secure following the latest industry encryption standards.
