

Welcome to the third quarterly newsletter of 2024 from Fairfax Software! We are excited to share the latest updates and advancements with you, including several new and groundbreaking developments.

Fairfax Software Celebrates 30 Years of Excellence!

Fairfax Software proudly celebrates 30 years of excellence in delivering intelligent financial transaction processing solutions. Since our inception, we have been dedicated to providing cutting-edge technology and unparalleled service to government agencies and Fortune 500 companies. Our innovative solutions have consistently set the industry standard, enabling accurate payment processing, enhanced efficiency, and enterprise financial management. As we mark this significant milestone, we reaffirm our commitment to innovation and excellence, continuing to empower our clients with state-of-the-art solutions that redefine financial transaction processing.

Revolutionizing Intelligent Financial Transaction Efficiency: The Powerful Integration of AI and RPA with:
Quick Modules + AI

In the constant advancement landscape of artificial intelligence in the workplace, businesses are continuously looking for innovative solutions to streamline their financial processing operations, reduce costs, and enhance overall efficiency. **Quick Modules + AI** stands as the premiere solution, seamlessly integrating intelligent document processing and process automation into a single enterprise platform. This powerful amalgamation leverages artificial intelligence (AI) to accurately identify and classify diverse inbound digital and paper content. Moreover, **Quick Modules + AI** transcends traditional document processing by incorporating Robotic Process Automation (RPA), offering a dynamic solution that excels in executing repetitive and mundane tasks, which frees up your workforce for more important tasks.

"Delete Log Tracker" is now available as a standard offering of our flagship solution, Quick Modules.

Is it important to track deleted pages (images) from your workflow for visibility and auditability of physical paper?

If so, Fairfax Software has added Delete Log Tracking.

Delete Log Tracking provides a new functionality in **Quick Modules** that records deleted pages/transactions/batches to provide tracking on paper documents that are deleted from a workflow. Delete Log Tracking provides the ability to track deleted pages that are handled physically when pulled from the digital workflow. In support of this new feature, **Quick Modules** has added an extension to the current workflow to support the tracking of deleted pages. With Delete Log Tracking, **Quick Modules** provides **Quick Deletion Tracker** to provide a monitor to manage and resolve the status of transactions or batches with deleted pages. **Quick Deletion Tracker**, a new monitor, provides the needed visibility, manageability, and auditability for physical pages deleted from its original [digital]

Indiana Department of Revenue visits Fairfax Software Headquarters in Tampa, Florida.

We recently hosted representatives from the [Indiana Department of Revenue \(INDOR\)](#) at our Tampa, Florida headquarters, and we're delighted to share that their visit was exceptionally positive. Their expressed satisfaction underscores our team's commitment to delivering outstanding customer service and fostering collaborative partnerships.

Our longstanding relationship with INDOR, spanning a decade, exemplifies our dedication to excellence and mutual success. We are deeply appreciative of their recognition of our teamwork and efforts.

As we move forward, we remain steadfast in our commitment to nurturing and strengthening this valuable partnership. We are excited about the opportunities ahead and look forward to further enhancing our relationship with INDOR.

workflow.

When a page, transaction or batch is deleted in Quick Review, Delete Log Tracking will automatically create an additional work object (WOB) to provide a facility to manage the offline process with physical paper. Through Quick Deletion Tracker, operations can search for deleted work by selecting a queue and then manage work objects needing attention. In Delete Log Tracker administrators can update the page status to resolved and provide an optional explanation for further documentation.

Embrace the Future with Fairfax Software's Cloud Hosting

In today's ever-changing business environment, the ability to adapt and scale quickly is essential. We're excited to announce that Fairfax Software offers cloud hosting for our comprehensive suite of solutions. By leveraging our cloud hosting services, you can unlock numerous benefits that drive efficiency, security, and scalability for your organization.

Benefits of Cloud Hosting:

1. Enhanced Security
2. Unmatched Scalability
3. Comprehensive Support
4. Cost Efficiency
5. Seamless Integration

At Fairfax Software, we are committed to providing innovative and reliable solutions that drive your business forward. Our cloud hosting services are backed by industry-leading technology and a dedicated team of professionals who are ready to support you every step of the way.

Don't let infrastructure constraints hold you back. Embrace the future with Fairfax Software's cloud hosting solutions and experience the benefits of enhanced security, unmatched scalability, and comprehensive support.

Fairfax Software Case Studies

A premiere intelligent financial transaction processing solution is the cornerstone of any successful government agency or Fortune 500 company. As a forefront leader in intelligent financial transaction processing solutions, Fairfax Software allows you to accept universal payments using state-of-the-art methods.

Let's peek at how our solutions have made a difference for some of our clients:

OVERVIEW

Challenge
In response to existing needs, Kern County, California, needed a new payment system to streamline its online system. Incorporating the requirements of security and integrity, the County sought a comprehensive, web-based solution that could not only meet current requirements but also offer scalability for future growth. Kern County needed a solution to implement this vision without impacting any operations.

Solution
Fairfax Software implemented its Quick Modules Cashier system to offer Kern County comprehensive enhanced and user-friendly banking solutions.

STATE OF THE ART CASHIERING
The solution offers state-of-the-art capabilities including: real-time processing, auto-void, auto-credit, and auto-chargeback. The system also includes a robust reporting system, allowing users to generate reports on demand. The system also includes a robust reporting system, allowing users to generate reports on demand. The system also includes a robust reporting system, allowing users to generate reports on demand.

OVERVIEW

Challenge
Human RX desperately needed an online solution that could streamline efficiency, increase their cash flow, and reduce customer service and support-related time and costs.

Solution
Fairfax Software implemented its Quick Modules software on their system to connect their online and offline systems, reduce paper / manual, and streamline their cash flow. The solution also includes a robust reporting system, allowing users to generate reports on demand.

SOJOURN TO THE "RIGHT SOURCE"
After a long and arduous search, Human RX found Fairfax Software. The solution offers a robust reporting system, allowing users to generate reports on demand. The system also includes a robust reporting system, allowing users to generate reports on demand.
