Fairfax Software *Quick* Payments
One Solution • One Workflow • One Provider

A Full Featured Enterprise ePayment Portal

Designed by Fairfax Software, *Quick* Payments is a full featured Enterprise ePayment Portal that is an extension of the award winning *Quick* Modules system. The solution is designed to provide state-of-the-art payment processing to existing applications. Using web services API's, all applications that require payments can have access to all of the features and functions provided by *Quick* Payments without costly time consuming development required to add features to each individual application. As new payment options become available or requirements change, changes are made to *Quick* Payments providing new functionality to all connected applications instantly. The solution is cloud based and can be hosted by Fairfax Software or your in-house data center.

Complete back office integration including:

- Connections to Merchant Services Providers provide support for all connected applications
- Real time and batch-based posting options
- A consolidated transaction file is provided for download to financial systems
- Automatic reconciliation of bank statements
- Automatic generation of journal entries
- Automatically generate and email statements
- Generate invoices on-demand for immediate payments

- Data is managed in a SQL database
- Support for legacy system database lookups
- Options for walk-in and mail in payments
- Comprehensive system audit features
- The latest data security and encryption
- Template based point-and-click setup allows for customized configurations
- *Quick* Workflow Monitor provides up to the minute status of system activity
