FAIRFAX SOFTWARE

Quick Branch Capture

Capture checks at remote locations and then add them to a centralized workflow for an easy stream of highly organized information directly to a consolidated Microsoft SQL Database and metadata are uploaded to OnBase.

The data is then seamlessly posted to the corresponding Check21 Software. *Quick* Reports module can then give you a detailed breakdown of the batch: batch number, routing number, account number, check number, and balance.

The Latest Processing Features

- Scan and Capture at the branch
- Automatic Processing
- Verify Images are Check21 ready
- MICR Recognition
- CAR/LAR Recognition
- Fraud Detection
- Balancing
- Reporting
