Quick Modules • The Choice for City and County Government

One Solution • One Workflow • One Provider

Nowhere are the benefits of image information processing more visible than in the tax and revenue industry.

More than a quarter century of experience in tax processing, Fairfax Software, with its latest version of *Quick Modules* 5.0, continues to be a dominant leader in the state, city, county departments, and numerous Fortune 500 companies.

Quick Modules' comprehensive data capture, single workflow, and common business rules capabilities, are the gold standard within the industry, as is *Quick Modules*' exceptional ability to process both structured and unstructured forms.

The *Quick Modules* streamlined workflow automatically routes incoming transactions to operators for exception processing, balancing and key correction. Accurate character recognition means most forms and payment items navigate the workflow with no operator interaction required.

Quick Modules eliminates pre-sorting and other manual interventions. The software has the built-in intelligence to identify content of incoming mail (forms, correspondence, checks, etc.) when scanned. Data is accurately classified and captured regardless of the order it entered the workflow. And *Quick Modules* Check 21 capability reduces bank deposit time to minutes. Traditional two pass paper check processing is also available.

Quick Modules sophisticated reporting capability provides the ability to customize existing reports and to create ad hoc reports as required. The *Quick Modules* monitoring applications provide real time analysis of system health and performance.

As the name infers, *Quick Modules* is a modular system. What distinguishes it from other systems are the endless ways the modules can be hinged to create unique configurations to meet client needs. Change is inevitable! Budget restraints, new business requirements, legal requirements and new product introductions are but some of the events that force change.

Pay Your Way with Quick Modules

In addition to mail-in payments, options are available to accept payments from virtually any source that are captured into a single workflow with common business rules.

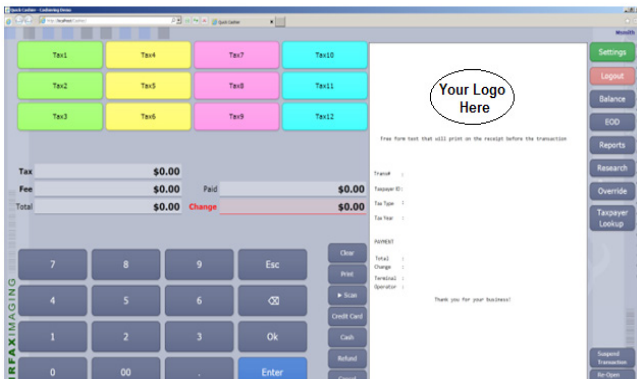

Quick Payments

Payment-enable your existing website with web-based electronic payments and invoice management. Pay electronically on-demand by card, electronic check, or ACH.

Quick Modules Cashier

A full featured browser-based cashiering system for walk-in payments, *Quick Modules Cashier* accepts all payment types including cash and checks and provides a customized customer receipt.

Quick Mobile Capture

Quick Mobile Capture allows field personnel to capture a payment with their smartphone or tablet and add it to the workflow instantly to prevent an interruption in service.

Quick Modules features:

- Point-and-click user interfaces designed for high productivity.
- High Volume? Not a problem. The architecture scales from hundreds of payments to millions of payments per day.
- *Quick Modules* supports a variety of scanners including high volume OPEX® and ibml scanners, departmental scanners, and tabletop scanners. Scanners can be located across the room or across the country.
- Virtual batching means no presorting required before scanning.
- Data is safe and secure with state-of-the-art encryption and security following FIPS Publication 140-2

About Fairfax Software

Fairfax Software, headquartered in Tampa, Florida, was founded in 1994 to provide high quality products and integration services to the document, fax, and form processing industries. Since its inception, Fairfax Software has remained focused on its primary niche area of expertise.

Fairfax Software's solutions are currently processing all the incoming tax, labor, and motor vehicles' remittances in thirty-five (35) states! Fairfax Software is also a market leader in several other application areas including healthcare, insurance, donations processing, and order entry/subscription fulfillment.
