# Fairfax Focus

Have You Considered Lowering your Costs?

As a leading software provider, Fairfax Imaging offers its clients the option of hosting services in Fairfax Imaging's secure hosted cloud processing environment. Whether the solution is for *Quick* Modules, *Quick* Payments for internet-based payments or *Quick* Cashier our over the counter payments solution, our clients can eliminate startup costs and reduce future expense using our Software as a Service (SaaS) model.

This SaaS approach gives clients the option to host their *Quick* Modules solution in the cloud with a pay-as-you-go pricing model.

Our cloud approach provides complete hosting of the proposed solution. The client has secure access to use the modules necessary for operation and is accessed remotely. Furthermore, the system is maintained and supported by Fairfax Imaging personnel.

Here are just some of the many benefits of hosting:

- Reduce or eliminate upfront investment cost associated with system infrastructure, maintenance, and operations.

- Eliminates client FTE costs associated with monitoring, or performing system maintenance.

- Automated backup and recovery.

- High availability solution.

- Dedicated Disaster Recovery solution.

Fairfax Imaging engineers are responsible for managing the entire solution, including any updates, maintenance, and backup of the solution.

A hosted *Quick* Modules solution works in a very similar fashion to an on-premise installation. Batches are scanned to a local file server; a service monitors the folder for new batches and automatically uploads the batch to the Fairfax Imaging AWS environment via an encrypted tunnel.

Fairfax Imaging's hosted services use Amazon Web Services (AWS). All virtual servers are located in the AWS cloud which are spread across multiple data centers throughout the country. AWS has a rigorous compliance and testing program that follows a number of security best practices, including FedRAMP.

For more information, or to see if it would be advantageous for you to move to a SaaS model, contact your account manager for more information.
