Fairfax Imaging is a leader in turnkey image-based products and solutions for the data capture, forms processing, document imaging, and tax remittance processing industries. We profile this dedicated and innovative firm and the creative solutions

Fairfax Imaging, Inc. was established in 1994 to provide products, services, and solutions to the document management, data and forms processing, and data entry industries, in the commercial and government sectors. Since inception the firm has built a solid base of system installations in the Commercial, Federal, and State marketplaces, as such it has gained a solid reputation as a premier solutions provider. By utilizing its solutions, customers are able to perform their data capture tasks more efficiently and more productively.

Among these solutions is Fairfax Imaging's award winning Quick Modules software, which optimizes document processing workflows by electronically identifying, capturing, validating, and updating critical information clients receive whether electronic or paper form, including checks for Check 21 processing. The system processes virtually any document within a common workflow improving productivity and achieving a high return on investment.

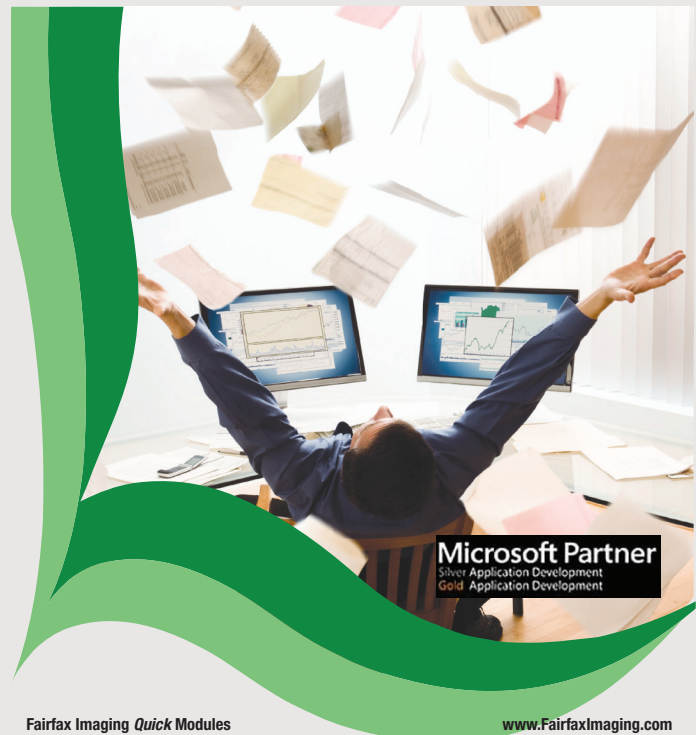

In order to offer a wide range of products designed to meet client needs, the firm builds core products based on technological breakthrough in the imaging, character recognition, and document workflow fields. When designing these products, Fairfax Imaging takes the utmost care to ensure that they are easily and seamlessly integrated with larger end-user systems. Such seamless integration can be performed by Fairfax Imaging, the end-user client, or a third party system integrator, as needed to meet the objectives and requirements of the end user client.

Imaging has remained firmly focused on its primary niche area of expertise. This focus and commitment to quality have lead Fairfax Imaging to become a leader in the area of document imaging and automated data capture. A number of Fortune 100 corporations including

some of the largest corporations in the world, have entrusted their automated and human-assisted data capture needs to systems built and installed by Fairfax Imaging. By doing so, these corporations have seen a tremendous improvement in the efficiency and productivity of their workforce. They were also able to reap immediate and tangible returns on investments.

Ultimately, some of the most mission-critical applications in the world have been successfully entrusted to Fairfax Imaging. In order to maintain the highest level of customer satisfaction, the company has always embraced a customer-centric management

approach. In this approach, it commits to its partners and clients that for each project, that the firm will always supply a dedicated seasoned Project Manager, and number of project engineers, who always stand ready to serve the client, and whose sole mission is to provide functional systems, integrated on site and within the customer's environment. Moreover, Fairfax Imaging has provided business reengineering services to many government agencies and Fortune 100 companies throughout the US, and moving forward it will continue to support these clients as it seeks to build its knowledge base and grow as a company.
