Quick Payments has been selected and was recently accepted in New Zealand to transform the online experience for purchasing government services. In the past, when a resident needed to renew a license or purchase a government service each website had a different customer experience for making the payment - each with their own screens, payment options, and limitations. Enter Fairfax Imaging with our partner Holistec Systems Limited. *Quick Payments* and its innovative features were deployed to simplify the process for the customer by providing a consistent web-based payment experience across business units while streamlining back office accounting.

Using web-based API's, *Quick Payments* was connected into existing websites without the need for a complete website redesign just to improve the payments process.

- Real time and batch-based posting
- Automatic download to financial systems
- Automatic statement reconciliation
- Automatic journal entries
- Generate and email statements
- Comprehensive system audit
- The latest data security and encryption
- Template based point-and-click setup

FAIRFAIX IMAGING WINS MAJOR PAYMENT PORTAL CONTRACT

Fairfax Imaging announces a major contract to implement a Fee Payment System for the Colorado Bureau of Investigation (CBI), a statewide law enforcement agency. The Fairfax Imaging solution will be based on *Quick Payments* - an extension of the award winning *Quick Modules* platform to web-based payments.

The CBI provides forensic, criminal investigative and criminal justice information services to local law enforcement and criminal justice agencies in Colorado. Among its criminal justice information services, the CBI provides automated biometric fingerprint identification services for 65 professions that are by law required to submit fingerprints, instant criminal background checks for firearms transfers, concealed handgun permits as well as operates a state toxicology laboratory. Each of these program areas require the CBI to invoice customers monthly for services rendered and process payments. *Quick* payments will connect to various CBI host systems to create and distribute monthly invoices, provide a web portal to process payments supporting a variety of payment types, and provide a user-friendly customer self-service web portal so customers can track their payment history and print copies of statements and invoices on demand.

Easy-to-use *Quick Payments* will provide a one-stop shopping for all services allowing a single statement and payment for services across all programs provided for the month. In addition to making it easier and more convenient for the customer to do business with the CBI, back-office processes will be streamlined with automated statement reconciliation and other automated accounting features.

Contact your Fairfax Imaging salesperson for more information.
